

Final Year Project Documentation Guide

Chapter 1: Problem Identification

State the objective of your work: what you intend to do and the problem you're setting out to solve.

In this chapter, clearly define the project purpose and the core problem addressed by the system.
Include:

Chapter 2: Literature Review

Cover what has already been done in this area, what's lacking or weak about the existing solutions, and the technology you're using to address those gaps.

Suggested content:

Chapter 3: Methodology

Explain how you intend to solve the problem you've identified. Justify your methodology and the choices you've made.

This section should provide enough detail for reproduction, including:

Chapter 4: Implementation

Discuss what you actually did to arrive at your results.

Include details such as:

Chapter 5: Results, Testing & Discussion

Share your results and test outcomes. Document everything with screenshots and supporting evidence.

This chapter should include:

Additional notes:

If you have screenshots or evidence, include them in the final document or as an appendix. Make the guide clear, concise, and easy to follow for examiners.
